

ATMEGA128

DRIVERS	Atmega32	Atmega128
DIO	4 groups {A,B,C,D}	7 groups{A,B,C,D,E,F,G(only 5pins)}
External interrupt	• It have 4 interrupt vector • It have interrupt 1,0 with its sense • It have 3 external interrupt request flag • It have 3 general interrupt flag	• It have 7 interrupt vector • It have 4 external interrupt for register A with it sense • It have 4 external interrupt for register B with it sense • 1byte for external interrupt request • 1byte for external interrupt flag
ADC	It have special function register and it consist of 3bit that are called auto trigger they do certain job when assigned to zero and ones	It doesn't have it
